### Areas of Research

Periodontal tissue engineering

### About your contribution towards the Research & Development, Innovations, and Extension Activities (200 words)

Focusing on the basic and clinical transformation research of accurate orthodontic diagnosis and treatment for health, we independently develop a complete set of orthodontic appliance accessory system processing plans and orthodontic treatment systems with independent intellectual property rights. We have obtained 7 national invention patents and 17 utility model patents, and 2 authorized patents have been signed conversion agreements. We have led the development of industry standards for brackets free orthodontic appliances.

Relying on the hospital's wholly-owned Jingmei Company (the largest publicly owned university processing factory) to independently master 3D printing personalization, digital orthodontic appliance accessory design, and production patent technology, we have held over a hundred learning classes, transformed them into clinical applications in 20 provinces and cities, and achieved an annual output value of over 50 million yuan.

We have established a scientific and technological innovation research team with cutting-edge and interdisciplinary characteristics. The applicant has been awarded the National Clinical Key Specialized College, National First Class Undergraduate Major, National Experimental Teaching Demonstration Center, National Virtual Simulation First Class Course, Ministry of Education Virtual Simulation Experimental Teaching Alliance Oral Medicine Technology Collaborative Virtual Teaching and Research Office, the first batch of Chongqing Medical Leading Talents, Chongqing Talent Innovation Leading Talents, and Chongqing Chief Science Communication Expert.
